

BluSezam EAM
Enterprise Asset Management

BluSezam Enterprise Asset Management module is one of the members of the **BluSezam** platform product family. The use of the **BluSezam EAM** system facilitates management by collecting all property income (fixed assets, low-value assets, intangible assets) in one register and a record of the full history of their use and benefits. All documentation related to a given component is documented in a version, which speeds up the search for ventoring and automatically creates inventory works.

What makes the **BluSezam EAM** system unique?

- **BluSezam EAM** system is based on a web browser, so it can be quickly accessed from any computer in the internal computer network (multilingual version);
- The application interface is clear and easy to use;
- The system enables free assignment of access rights to individual users;
- Easy to further expand and introduce new functionalities;
- Self-expansion of the system by users by adding additional fields and dictionaries;
- The system supports all processes related to keeping records of assets (fixed assets, equipment, intangible assets, etc.);
- Inventory taking with the **BluSezam** system is automatic
- Automatic generation of post-inventory documents (inventory sheet, surplus, displacement, shortage, inventory summary).

BluSezam system is also distinguished from other solutions by the unprecedented readability and intuitive use of the program, making it easy for even a new user to perform the necessary tasks. The system allows for a great freedom in configuration by adding additional text, numeric or dictionary attributes to almost every element of the system. Additionally, the system allows for flexible configuration of reports and documents, thanks to which it is possible to create various summaries both within the inventory and outside it.
